

Carers Mental Wellbeing And Resilience Course

Course Overview and Application Form

Overview

Learning how to manage your own mental health and wellbeing while caring for someone else, can sometimes be a balancing act. This course has been designed to give you information and tips to help.

Course aims

The course is designed to help individuals understand common challenges that many unpaid carers encounter, as this might make you feel less alone.

Reflecting on the caring situation you are in currently, is the starting point to know what small changes you may be able to make, that might help you feel more able to cope, and improve your own mental wellbeing and resilience

Objectives are to:

- Bring together people with shared experiences of the caring role,
- Take 'time out' and reflect on what you need
- Provide a space where individuals feel accepted and understood
- Keep yourself well so you will be in a position to care for others.
- Be kind to yourself, self-compassion and acceptance
